# MD BAYEJID BHUIYAN

## Software Developer

### PROFILE

I am Md. Bayejid Bhuiyan, a passionate software developer with a foundation in full-stack development. I recently graduated from Daffodil International University and possess good knowledge in machine learning, especially deep learning, as well as PHP and Laravel development. I also have a basic foundation in React Native and Python Django. I am skilled in building dynamic web applications, creating responsive designs, and integrating modern technologies, including machine learning. I am a lifelong learner who embraces challenges and views failures as opportunities to grow better.

### PERSONAL PROJECT

Django, PostgreSQL, Django REST Framework.

- Built a Task/Project Management Tool with Kanban boards, task assignments, and real-time updates using Django Channels, PostgreSQL, and REST APIs, deployed online to showcase full-stack development-skills.

Laravel, MySQL, Blade, Bootstrap

- Developed a Laravel-based e-commerce website with product catalogue, shopping cart, checkout system, and user authentication, using MySQL for data management and deploying the application online to showcase full-stack web development skills.

Laravel, MySQL, PHP, Machine Learning

- Enhanced a Laravel e-commerce website with an image-based clothing search system using machine learning, enabling users to find products by images and showcasing full-stack and ML integration skills.

React Native, Django, PostgreSQL

- Developed an Employee Attendance App with login-based recognition and QR code/geolocation check-in, featuring check-in/out, attendance history, and admin reporting, deployed online to showcase full-stack mobile app development skills.

### HOBBY

Watching thought-provoking and inspiring movies.  
Exploring new technologies, places, and ideas.
